OBJECTIVE

Experienced FullStack Developer with 3.3 years of practical expertise in developing and deploying applications and solutions using diverse technologies and programming languages. I am enthusiastic about securing a position that allows me to leverage my skills and capabilities to contribute significantly to the organization's growth while advancing my professional career.

EXPERIENCE

Senior Software Engineer (FullStack Developer)

QSS Technosoft Inc.

April 2022 - Present

Noida

1. Elder Connect

- Our mission is to enrich the lives of seniors worldwide by facilitating meaningful connections through immersive virtual classes, events, and curated content, all underpinned by a robust Microservice Architecture.
- As the lead UI developer, I am spearheading the development of our user interface, leveraging state-of-the-art technologies such as Next.js, React.js, SCSS, and TypeScript.
- I autonomously drive the project's development, ensuring seamless integration of critical platforms including Auth0, Vercel, Hasura, Stripe, Cloudflare, Zoom, Mailgun, and Twilio.
- Successfully integrated the **ZoomSDK** to enable seamless event hosting within our portal.
- Efficiently managed a substantial volume of live video streams through **Cloudflare**, maintaining optimal performance across our user interface services.
- Developed a comprehensive system for managing event notifications seamlessly.
- Meticulously implemented **Stripe payment gateway integration**, encompassing features such as creation of checkout sessions, robust handling of payment failures, membership cancellations, and reactivations.
- Implemented **shimmer components** throughout the project, enhancing the overall user experience.
- Additionally, devised and implemented a **Share Account** feature, empowering users to share their accounts with designated individuals for enhanced accessibility and collaboration.

2. GPS

- Aimed at efficiently managing employees, clients, contractors, and the hiring process, as well as handling sensitive HR details for the company.
- As part of my role, I actively participated in daily standup meetings and collaborated closely with business analysts (project owners) to comprehend business logic and client requirements.
- I focused on optimizing code and improving response times by reevaluating the component structure.
- Additionally, I successfully developed a new system that captures comprehensive commit histories from various projects managed by clients. This implementation involved leveraging tools like GitHub, GitLab, and employing Promises, async, and await functionality effectively.

System Engineer (Frontend Developer)

Infosys

Nov 2020 - Mar 2022

Chennai

3. AT&T Services

- Our goal is to fortify our network, enabling a wide range of advancements, from smarter homes and cities to high-quality remote healthcare, augmented and virtual reality experiences.
- Developed or Modified the UI using React JS, Typescript etc tech. to attract more customers.

STRENGTHS

Hard-working

Persuasive

UX

Proficient in learning new technologies

SKILLS

Technical Skills : React JS, Next JS, NodeJS, Javascript, Typescript, HTML/CSS, MySQL, SCSS, Rest API, GraphQL, Data Structure

FrameWorks/Libraries/Developer Tools :

Tailwind CSS, React Developer Tool, Express, Bootstraps, Material UI, Prismic CMS, Vercel, Redux, Git, Postman, Auth0, zoom

ACHIEVEMENTS

- Problem Solving Skills :**
Solved 400+ DSA problem on GFG.
<https://auth.geeksforgeeks.org/user/amriteshverma129>
- Github:** Created many small projects using vanilla javascript.
<https://github.com/amriteshverma129?tab=repositories>

CERTIFICATES

- Namaste React :** Completed
- Namaste Javascript:** Completed
- Namaste Frontend System Design and Security** InProgress

EDUCATION

B.Tech (AKTU)

2016 - 2020

Ghaziabad

H.S.C (Sun Flower Public School)

2014 - 2015

Ballia

S.S.C (DALIMSS)

2012 - 2013

Varanasi
